

Subject:	JAI Camera's
Models:	CV-S3200
Scope:	Camera Connections

The New CV-S3200 Camera is a Hi-Resolution PAL format camera. This camera is now the standard for all DJH Systems. The main advantage for the PAL system is the larger capture window that this format allows.

	<p>S-Video Connector (also referred to as Y/C)</p> <ul style="list-style-type: none"> Connect the S-Video or Y/C Cable to this connector (the Y/C cable is a black cable with a 4 pin connector on either end) <p>DC Power in and Camera control Interface connector</p> <ul style="list-style-type: none"> Connect the Interface cable to this connector (see below for details on this cable)
	<p>Camera Interface Cable</p> <ul style="list-style-type: none"> The cable provides 12VDC power for the camera and also provides the interface connection for camera control (camera control is a option that will be available in a future release of the DJH View Software) <p>The cable has 3 connectors a single male connector with 4 pins on one end, and a y split on the other end with a male and a female connector.</p>
	<p>The split cable side connects to the PC the male connector plugs into the capture card 9 pin connector, and the female connector is plugged into any available Serial connector on the PC.</p>
